and 23rd (Sat.) for the Fukuoka Museum Week 2015.  
Hosted by The Kyushu University Museum.

# Professor NAKAYAMA Heijiro (1871 – 1956)

The first professor of Pathology at the Fukuoka Medical School (a predecessor of Kyushu University School of Medicine).

Not only he built achievements of medical research on the life cycle of *Schistosoma japonicum*, he is also well known for his contribution to archaeology of Kyushu during Taisho Era and early Showa Era.

## About Prof. NAKAYAMA

Not only professor Nakayama conducted medical research, but also he has been taking an interest in archaeology and he often visited sites since his boyhood days. After he assumed his duty as a professor of the Fukuoka Medical School, he started serious archaeological research of ancient history, then he became a leading archaeologist in Kyushu during Taisho Era and early Showa Era. He collected a large amount of materials by survey at sites without excavation, and he produced many research accomplishments revealing relationship between materials and the sites.

## About The Exhibition

The Kyushu University Museum houses a set of Nakayama Heijiro Collection donated by Mr. and Ms. Okabe (successors of Mr. Yoitsu Okabe: a pupil of professor Nakayama).

This exhibition displays the collection and other collections related to professor Nakayama. These collections include materials having high academic value such as archaeological remains which professor Nakayama introduced on his academic papers, his autographic field notes, and his autographic manuscripts of important papers in a scholarly history. The exhibition also introduces Kyushu University's recent research using materials of the Nakayama Heijiro Collection.

## Main archaeological achievements of Prof. Nakayama

- Research in Gold seal “Kinin” .
- Propose the existence of Middle age between Stone Age and Iron Age , i.e. Yayoi Period.
- Research in the production system on Imayama stone axes of Yayoi period.
- Research on ancient Hakata
- Discovery of Korokan, official guest house established in the Heian period.

A Sketching of the stone knife by Prof. Nakayama

## Recent research using materials of the Nakayama Heijiro Collection.

### Identification of the origin of the Archaeological stone tools using petrological analyses.
